Computational Statistics for Genome Biology
28th June 2013

Overview

We are about to create the QuickPackage R package:

1. Create a dummy function to come into the package
2. Create the package structure
3. Update the package content
4. Build/check/install
5. Enjoy!

```
> ## This is the dummy function that will return
> ## information about our 'QuickPackage'
> qpf <- function()
+     packageDescription("QuickPackage")
```

```
> ## This creates the package template
> package.skeleton("QuickPackage", list = c("qpf"))

Creating directories ...
Creating DESCRIPTION ...
Creating NAMESPACE ...
Creating Read-and-delete-me ...
Saving functions and data ...
Making help files ...
Done.
Further steps are described in
'./QuickPackage/Read-and-delete-me'.
```

QuickPackage structure:

```
QuickPackage/
|-- DESCRIPTION
|-- man
|   |-- qpf.Rd
|   `-- QuickPackage-package.Rd
|-- NAMESPACE
|-- R
|   `-- qfd.R
`-- Read-and-delete-me
```

- Read and delete `Read-and-delete-me`
- Update `DESCRIPTION`
- Write a proper package documentation file or delete it (this is the only optional documentation) and update the man page for `qpf` (see next slide)

```
\name{qpf}
\alias{qpf}
\title{ A test function }
\description{
  Returns package information.
}
\usage{
qpf()
}
\value{
An object of class \code{packageDescription}.
}
\examples{
qpf()
}
```

In a terminal:

1. Build the package with
   `R CMD build QuickPackage`
2. Check the package with
   `R CMD check QuickPackage_1.0.tar.gz`
3. If any, fix errors and warnings and repeat steps 1 and 2.
4. Install the package with
   `R CMD INSTALL QuickPackage_1.0.tar.gz`

```
> library("QuickPackage")
> qpf()

Package: QuickPackage
Type: Package
Title: A quick and mini R package
Version: 1.0
Author: Laurent Gatto <lg390@cam.ac.uk>
Maintainer: Laurent Gatto <lg390@cam.ac.uk>
Description: Mini intro on building R packages.
License: GPL-2
Packaged: 2013-06-11 00:07:57 UTC; lgatto
Built: R 3.1.0; ; 2013-06-11 00:08:07 UTC; unix

-- File: /home/lgatto/R/x86_64-unknown-linux-gnu-library/3.
```
